

**ABSTRACT**

An olefin polymer composition which comprises an olefin polymer and inorganic solid dispersed in the olefin polymer,  
5 wherein the coagulation degree  $\theta$  of the inorganic solid satisfies the following expression:

$$0 < \theta \leq 10,$$

wherein  $\theta$  is a value determined by dividing  $d$  by  $D$ ,  $d$  represents a dispersed particle diameter of inorganic solid dispersed in  
10 the olefin polymer, and  $D$  represents a primary particle diameter of inorganic solid used for being contained in the olefin polymer.
